

VOXEL ORBIT

A 3D cube-pop colour puzzle: spin the sculpture, send the right UFO, pop the cubes

LIVE ON iOS · 25 SEP 2026

ANDROID CLOSED TEST

UNITY 6

SOLO BUILT

Dino Park · the T-rex hides a chicken

What will hatch? · egg → chick

Ocean Treasures · galleon → gold

Layer by layer · doll → smaller doll

A toy sculpture floats in space, and **every one hides a surprise inside**. Colour-coded UFOs wait in your hangar; tap one and it orbits the sculpture on a glowing ring, blasting every cube of its own colour it can see.

Pick the right UFO, turn the sculpture by hand so each one finds its cubes, charge the TURBO, clear the sculpture and reveal what was hiding in it. No timers, no lives, plays offline.

CONTENT

60 levels, 60 hand-made sculptures, a reveal in every one

TECH

Unity 6; custom mesh-to-voxel pipeline written in Blender

MONETISATION

Rewarded, interstitial, no-ads pack designed in; off until a test

STATUS

v1.0.2 on the App Store; Android closed test, build within a week

Numbers so far — App Store Connect 5 Sep–4 Oct · Firebase 8 Sep–5 Oct · organic only, zero paid UA

Store page conversion	5.6% 30-day average · about 8% in launch week
Average engagement per active user	17 min 05 s · 2.9 sessions
Level win rate	88% (687 level starts / 606 wins)
Traffic source	App Store Browse only; no ads, no search campaigns, no press
Crash-free users	91.7% (7 days); store build has no known crash
Retention	Not enough data yet on a small organic base. A test is the point.

What I am looking for: a CPI / marketability test on iOS with a publisher that runs the traffic. I deliver store link, build, 30-second gameplay video and four vertical ad concepts the same day; Android build within a week of a yes. I own the IP in full; my company registers in October 2026.
